

*Zero Toners
to
Landfill project*

Itec Free State

Itec Free State launches

“Zero Toners to Landfill project”

Itec Free State, as a supplier of Office Automation, is committed to minimizing its impact upon the environment.

As a supplier of Copiers, Printers, Multi-Functional Devices, we also sell or provide toners to our clients on a daily basis. But what is happening with the empty toner cartridges? Most of them will end up in our landfills, and thus not helping the fight against Climate Change.

Itec Free State will be providing this Toner Recycling project to our clients FREE OF CHARGE.

Itec Free State will be recycling the following Toner or Ink Cartridges:

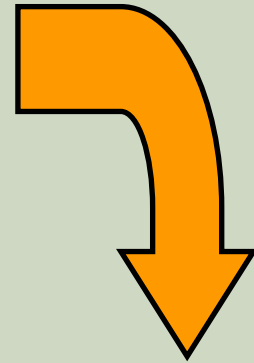

How does it work?

STEP 1

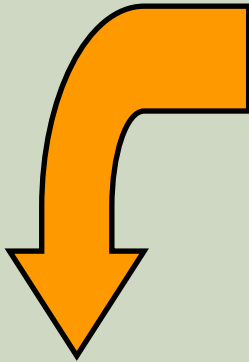

- After replacing the new toner into the machine, place the empty toner in the toner box.
- Mark the box with: Empty Toner
- Keep in a safe place till you order new toner.

STEP 2

When ordering new toner please inform the Itec employee with whom you are ordering new toner, that you have empty toner bottles or cartridges to return for recycling.

STEP 3

When receiving new toners, please give the Itec Drivers your box with empty toner. The Driver will ensure that the toner gets to the recycling bins at the Itec Offices
